Greene climacteric scale visit record

A clinician-side sheet for recording permission and subscale scores at every visit.

Patient name: _____ Patient ID / record number: _____ Clinician: _____

1. PERMISSION AND FORM CONTROL

☐ Permission requested from RWS Life Sciences (greeneclimactericscale@rws.com) on _____

☐ Written reply filed with the master copy of the form Reply date: _____

☐ Format covered by the reply: ☐ Paper ☐ Digital ☐ Not stated

☐ Wording unaltered: all 21 questions and the four response labels exactly as licensed

☐ Reviewed by medical director / legal counsel Date: _____

2. SUBSCALE SCORES BY VISIT

Subscale (items)	Range	Visit 1	Visit 2	Visit 3	Visit 4	Visit 5
Visit date						
Psychological (1–11)	0–33					
Anxiety (1–6)	0–18					
Depression (7–11)	0–15					
Somatic (12–18)	0–21					
Vasomotor (19–20)	0–6					
Item 21 (sexual dysfunction probe)	0–3					
Completed in the same time window?	Y / N					
Clinician initials						

How to score. Add the patient's 0–3 ratings (0 not at all, 1 a little, 2 quite a bit, 3 extremely) within each subscale. Anxiety and depression subdivide the psychological score. Record item 21 on its own. The RWS scoring method defines no overall total.

Review triggers. RWS lists cut-offs of 10 or more on the anxiety subscale and on the depression subscale as flagging women who may be clinically anxious or depressed. Agree with the medical director what a high score triggers, such as a clinician review.

Practice trigger: _____

3. CLINICIAN NOTES

This sheet holds no Greene climacteric scale questions. Request the questionnaire, and permission to use it, from RWS Life Sciences. A symptom score records how severe the patient rated her symptoms on the day. It does not diagnose a menopause stage or set a treatment threshold. Scoring structure per RWS Life Sciences, lifesciences.rws.com/greeneclimactericscale.
